SKILLS

GAME DEVELOPMENT

- Unity (C#)
- Gameplay Programming
- Mobile Game Development
- 2D & 3D Physics
- Game UI / HUD
- Level Design

MONETIZATION & LIVE OPS

- AdMob
- AppLovin MAX
- Ads Mediation & Wrappers
- Firebase Analytics
- Crashlytics
- Remote Config
- GameAnalytics

ENGINEERING

- Debugging
- Performance Optimization
- Git / Version Control
- Google Play & Amazon Appstore Releases

AI-ASSISTED DEVELOPMENT

- AI Coding Agents
- Agent Planning & Specs
- Token / Context Control (MD files)
- Superpowers
- Ponytail
- Game Dev Plugins

CERTIFICATES

Unreal Engine 5 C++
Multiplayer Shooter
Udemy · Aug 2022

Syed Afeef Abdullah

Game Developer · Unity (C#)

Unity game developer who has built and shipped 6 mobile games from scratch on Google Play. I work across gameplay, UI, ad monetization, analytics and live ops, and I use AI coding agents to plan and build faster while keeping token usage under control.

WORK EXPERIENCE

Associate Game Developer Mar 2025 — Present
OZI Publishers · Lahore

- Built and shipped 6 mobile games **from scratch** in Unity (C#), from prototype to release on Google Play and the Amazon Appstore.
- Integrated Ad SDKs and mediation (AdMob, AppLovin and others), which made ad delivery more reliable and improved monetization across live games.
- Used Firebase Analytics, Crashlytics and Remote Config to watch performance, change live parameters and cut crashes.
- Integrated GameAnalytics to track player behavior, progression and retention.
- Fixed runtime errors, SDK conflicts and performance issues, and kept live updates stable.
- Used AI coding agents for planning and implementation, with Markdown context files and skills (Superpowers, Ponytail, Game Dev plugins) to keep token usage low.

Game Development Intern Dec 2024 — Feb 2025
Smarnovative Labs

- Built 2D and 3D gameplay systems in Unity: player controls, UI interactions and physics-based mechanics.
- Used Unity's physics engine for realistic object movement and player interactions.

SHIPPED GAMES · GOOGLE PLAY

Zoo Party **LATEST · BEST WORK**
Party Action
Physics-based party brawler: fight friends as puppies, kittens and other animals, or team up on objectives.
[Google Play ↗](#)

Dig Hole: Cleaning Game
Simulation
Dig up buried junk and treasure, clean each find, collect rare items and upgrade tools.
[Google Play ↗](#)

Ant Colony: Food Puzzle
Puzzle
Color-sorting puzzle where ants carry cubes to matching holes, with limited slots and pixel art unlocks.
[Google Play ↗](#)

Cat Customs Security Simulator
Role Playing
A border-inspection sim: check passports, scan luggage for contraband and decide who gets through.
[Google Play ↗](#)

ScrapCraft: Machine Builder
Adventure
Physics-based building: collect scrap, build machines and vehicles, and battle robots.
[Google Play ↗](#)

Soul Heroes Robot Fighting
Action
An action fighting game.
[Google Play ↗](#)

PERSONAL PROJECTS

RIVALS: Final Year Project Oct 2022 — Jul 2023
Multiplayer third-person shooter prototype in Unreal Engine 5 with player movement, shooting systems and power-ups. github.com/AfeefAbdullah/Projects/tree/main/Rivals

EDUCATION

BS Computer Science Sep 2019 — Jul 2024
COMSATS University Islamabad, Lahore Campus
